

KARTHICK S

Senior Automation Test Engineer

Chennai, India | +91 6382026795 | karthickyvisri@gmail.com

PROFESSIONAL SUMMARY

Senior Automation Test Engineer with 5+ years of experience designing and maintaining UI and API test automation frameworks across the security, insurance, and annuity domains. Expert in Python, Selenium WebDriver, Pytest, and Behave/Cucumber BDD, with hands-on experience in the Page Object Model, data-driven testing, and rich test reporting (Allure, Extent Reports). Skilled in integrating automated suites into CI/CD pipelines (Jenkins, GitHub Actions) and in leveraging AI-assisted tools (Cursor AI, Claude) and prompt engineering to accelerate test authoring. Strong background in functional, regression, and API testing within Agile teams, consistently delivering 98% test coverage, a 98% defect-detection rate, and a 50% reduction in test cycle time.

TECHNICAL SKILLS

Programming Languages: Python, Java, SQL

Test Automation: Selenium WebDriver, Behave (BDD), Cucumber, Gherkin, Page Object Model (POM), TestNG, Pytest, Rest Assured

Test Reporting: Allure Reports, Extent Reports, pytest-html

AI-Assisted Development: Cursor AI, Claude (Anthropic), Prompt Engineering, AI-driven test authoring

API Testing: Postman, ReadyAPI, Rest Assured, Python Requests

CI/CD & Version Control: Jenkins, GitHub Actions, Git, GitHub

Databases: Microsoft SQL Server, Oracle SQL, PostgreSQL

Test Management: JIRA, qTest

Testing Types: Functional, Regression, Sanity, Smoke, API, UI, Data-Driven, End-to-End (E2E)

Domains: Physical Security & Access Control, Life Insurance, Annuities, Payments

Methodologies: Agile (Scrum, Kanban), SDLC, STLC

PROFESSIONAL EXPERIENCE

Senior Automation Test Engineer | Hirsch Private Limited

Chennai, India | April 2025 - Present

- Design and develop end-to-end UI test automation for the Velocity web application in the physical security and access-control domain using Python, Selenium WebDriver, and the Behave BDD framework.
- Author Gherkin feature files and step definitions, and build maintainable, reusable automation using the Page Object Model, explicit/implicit wait strategies, robust XPath/CSS locators, and externalized JSON test data.
- Generate detailed, shareable execution reports (Allure / pytest-html) to give stakeholders clear visibility into test results and coverage.
- Leverage AI-assisted tools (Cursor AI, Claude) and prompt engineering to accelerate BDD scenario and step-definition authoring, improving development speed and coverage.
- Integrate automated regression suites into CI/CD pipelines (GitHub Actions) for continuous, reliable execution, collaborating with developers in an Agile environment to ensure timely, high-quality releases.

Senior Test Engineer | Cognizant Technology Solutions

Chennai, India | December 2020 - March 2025

Client Project: American Equity Investment Life (AEL Insurance) | August 2023 - March 2025

- Developed new automated test cases using Python and Pytest for life insurance and annuity products, and maintained the existing Java Selenium automation framework.
- Automated REST API tests using Python Requests and Rest Assured, validating end-to-end data flows, service responses, and integrations.

- Designed and executed functional, regression, and sanity test suites, generated automated reports (Extent Reports), and integrated execution into Jenkins CI/CD pipelines.
- Managed the full defect lifecycle in JIRA and qTest and collaborated within Agile Scrum teams across requirement analysis, test design, and execution phases of the SDLC.

Client Project: Guardian Life Insurance (Guardian ESQA) | February 2021 - August 2023

- Built new automated test cases using Python and Pytest and maintained legacy Java Selenium framework code for life insurance products.
- Performed API automation using Python Requests, validating service responses and data integrity across integrated systems.
- Executed functional, regression, and sanity testing, achieving 98% test-case coverage and a 98% defect-detection rate, and reduced overall testing time by 50% through reuse of test scenarios and automation code.
- Trained and mentored new team members, accelerating onboarding and team ramp-up.

EDUCATION

B.E., Computer Science and Engineering

Muthayammal Engineering College (Autonomous), Rasipuram, Namakkal

2016 - 2020 | CGPA: 8.60

CERTIFICATIONS

- Prompt Engineering Certification
